Broker Division Case Study: New Broker – New Challenge

Background:

Admiral Leasing and Loans was recently contacted by a new broker with a funding requirement for one of their long standing clients.

The broker had previously used another funder to provide finance for the client's VAT bill. However, due to the impact of COVID-19, that funder was unable to assist.

Challenge:

Although outside of our typical professions loans criteria, Admiral were presented with a multi partner professional practice requiring a six figure, short term loan facility.

Solution:

Admiral was able to recognise the financial strength of the business and approved a facility for them. The broker has since renewed the loan, and from proposal to pay out, the process took less than five working days.
